

Credencing Scenario Worksheet

A printable worksheet for analyzing one belief, dispute, or institutional judgment.

Scenario

Name the claim and the context in which confidence matters.

- Claim under evaluation: _____
- Decision or action threshold: _____
- Stakes if wrong: _____

Estimate the Anchors

Use rough ranges. The goal is clarity, not fake precision.

- E0 range: _____ to _____
- EP range: _____ to _____
- CA range: _____ to _____
- SD estimate: low / medium / high

Diagnose the Gap

Choose the most likely repair path.

- If E0 and EP diverge, improve evidence access, statistics, or interpretation.
- If EP and CA diverge, examine fear, identity, incentives, or social cost.
- If both diverge, separate the repairs instead of treating the problem as one blur.
